PROFILE

Full-Stack .NET engineer with **2+ years** building enterprise-grade web applications with **C#, ASP.NET (MVC / Core), SQL Server and Angular**. I turn paper-based and spreadsheet-driven processes into secure, auditable systems — **financial modules, configurable approval workflows, KPI dashboards and ERP integrations** — and have delivered them for government clients in **Sharjah (UAE)** and **Medina (KSA)**. Strong OOP / SOLID foundations, security-first mindset (2FA, encryption, audit trails, OWASP) and fully bilingual in Arabic and English, including RTL interfaces.

2	5	2+	AR / EN
government platforms delivered (UAE · KSA)	financial modules, each with multi-stage approval	years of enterprise .NET, fully remote	native Arabic, professional English

CORE COMPETENCIES

Enterprise web platforms · Financial & budgeting systems · ERP modules · Approval workflow engines · RESTful APIs & integrations · KPI dashboards & reporting · Role-based access control · Application security & compliance · SQL Server & T-SQL · Bilingual / RTL interfaces

PROFESSIONAL EXPERIENCE

Full-Stack .NET Developer · Bernamji Company

Sep 2024 – Present · Remote

SPEA Support Services Management Platform

Sharjah Government · UAE

- Built an **ASP.NET MVC enterprise platform** that digitalises financial support services, replacing paper-based processes with one auditable system.
- Delivered **five financial modules** — Annual Budget Preparation, Purchase Requests, Budget Transfers, Budget Additions and Invoice Management — each with full multi-stage approval workflows.
- Implemented a **configurable workflow engine** with role-based access control, delegation, dual approval and automated email / SMS / in-app notifications.
- Designed a **KPI dashboard** giving management real-time visibility of department spending, pending requests, SLA compliance and financial commitments.
- Applied **government-grade security**: AES-256 encryption, TLS 1.3, 2FA, audit trail and rate limiting, compliant with UAE Data Protection Law No. 45/2021.

Stack ASP.NET MVC · C# · SQL Server · RBAC · 2FA · AES-256 · TLS 1.3

Amanat Al Madinah Laboratory Management System

Medina Municipality · KSA

- Built **laboratory testing modules** for asphalt, aggregate and soil tests with structured data entry, result tracking and **Excel / PDF reporting**.
- Implemented **lab-result approval pipelines**; collaborated on MFA, AI-assisted analysis and rate-limiting features.
- Worked on **core ERP modules**: Journal, Invoices, Taxes and Stock Management.

Stack .NET · C# · SQL Server · MFA · Excel / PDF reporting · ERP

PROFESSIONAL EXPERIENCE (CONTINUED)

Freelance Backend Developer · Drop-Shipping Platform

Apr 2024 · Remote

- Built a **RESTful API** with ASP.NET Core 8, JWT authentication, EF Core and N-Tier architecture covering shipping management, payments and order operations.

Coding Instructor · 3cSchool

Apr – Jul 2024 · Cairo

- Delivered front-end and Python courses; designed **project-based curricula** covering HTML, CSS, JavaScript and Python.

TECHNICAL SKILLS

Back-end	C# · ASP.NET Core MVC · ASP.NET Web API · SignalR · Entity Framework Core · ADO.NET · LINQ
Database	Microsoft SQL Server · T-SQL · Query optimisation
Front-end	Angular · TypeScript · JavaScript · jQuery · HTML5 · CSS3 · Bootstrap
Architecture	OOP · SOLID · N-Tier · Repository Pattern · Dependency Injection · Design Patterns
Security	MFA / 2FA · JWT · Audit Trail · Rate Limiting · OWASP · Encryption (AES-256, TLS 1.3)
DevOps & tools	Git · GitHub · Azure DevOps · IIS · Visual Studio · VS Code

WHAT I DELIVER FOR CLIENTS

S-01
Enterprise web platforms
Role-based ASP.NET systems that replace paper forms and spreadsheets.

S-02
Financial & ERP modules
Budgets, purchasing, invoices, journals, taxes and stock.

S-03
Approval workflow engines
Multi-stage approvals, delegation, dual approval, SLA tracking and notifications.

S-04
APIs & integrations
RESTful ASP.NET Core APIs with JWT, EF Core and real-time SignalR.

S-05
Dashboards & reporting
KPI dashboards plus Excel and PDF reports for management.

S-06
Security & compliance
2FA/MFA, encryption, audit trail, rate limiting and OWASP practices.

HOW I WORK

01
Map the real process
Requesters, approvers, documents and reports — before code.

02
Model data & rules
Clean SQL Server schema and written business rules.

03
Build in iterations
Working features early, built on SOLID and N-Tier.

04
Secure, ship, support
Roles, 2FA, audit trail, deployment and documentation.

EDUCATION

Diploma — Full-Stack Web Development (.NET / Angular) — Oct 2023 – Apr 2024
Information Technology Institute (ITI)

Bachelor of Engineering — Sep 2016 – May 2021
Giza Engineering Institute
